5. The following is an examiner's statement of reasons for allowance:

Claims 1, 8, 9, 30, 31 and 42 recite, inter alia, a method of forming an electrical device comprising the steps of forming a second insulating film over a first insulating film between the thin film transistor and the pixel electrode wherein the second insulating film comprises silicon nitride. The art of record does not disclose or anticipate the above limitation in combination with other claim elements nor would it be obvious to modify the art of record so as to form a device including the above limitation.

Claims 2, 13, 14, 33, 43 and 44 recite, inter alia, a method of forming an electrical device comprising the steps of forming a second insulating film over a first insulating film between the thin film transistor and the pixel electrode wherein the second insulating film comprises aluminum oxide. The art of record does not disclose or anticipate the above limitation in combination with other claim elements nor would it be obvious to modify the art of record so as to form a device including the above limitation.

Claims 3, 15, 16, 36, 45 and 46 recite, inter alia, a method of forming an electrical device comprising the steps of forming a second insulating film over a first insulating film between the thin film transistor and the pixel electrode wherein the second insulating film comprises diamond like carbon. The art of record does not disclose or anticipate the above limitation in combination with other claim elements nor would it be obvious to modify the art of record so as to form a device including the above limitation.

Claims 4, 17, 18, 37, 38 and 47 – 49 recite, inter alia, a method of forming an

Claims 52 – 57 recite, inter alia, a method of forming an electrical device comprising the steps of forming a third insulating film over a first and a second insulating films between the thin film transistor and the pixel electrode wherein the first and the third insulating films comprise diamond like carbon. The art of record does not disclose or anticipate the above limitation in combination with other claim elements nor would it be obvious to modify the art of record so as to form a device including the above limitation.

Claims 58 – 71 recite, inter alia, a method of forming an electrical device in which

the thin film transistor is covered with up to five insulating films with the third insulating film being an organic material. The art of record does not disclose or anticipate the above limitation in combination with other claim elements nor would it be obvious to modify the art of record so as to form a device including the above limitation.
